Plano, TX | (469) 367-8300 | ShuhongG0516@gmail.com | <https://www.linkedin.com/in/shuhonggu/>

EDUCATION

Rutgers, The State University of New Jersey

B.S. Information Technology & Informatics | Minor: Computer Science

New Brunswick, NJ

Anticipated: May 2027

Relevant Focus Areas: Networking Fundamentals, Operating Systems, IT Infrastructure, Security Fundamentals

PROFESSIONAL EXPERIENCES

Freelance IT Technician

Remote

Jan 2022 – Present

- Provided ongoing IT and endpoint support for Windows and macOS systems, identifying OS-level, hardware, and security-related issues impacting system stability and user access.
- Diagnosed and resolved network connectivity issues involving TCP/IP, DNS, DHCP, router configurations, and unstable wireless environments, ensuring reliable and secure network operations.
- Configured small-office networks with basic firewall rules, guest network isolation, and network segmentation.
- Assisted users with secure remote access and system configuration using TeamViewer and AnyDesk.
- Recovered compromised systems by isolating infected endpoints and restoring data from backups, minimizing downtime for clients

Rutgers, The State University of New Jersey

New Brunswick, NJ

IT Support Assistant

Oct 2024 – Nov 2025

- Provided first-level IT support to students and faculty through ServiceNow using structured ticketing and escalation workflows.
- Troubleshoot Windows and macOS issues, application failures, and DNS/DHCP-related network problems.
- Assisted with secure access configuration, including campus Wi-Fi, VPN connectivity, Microsoft 365, and MFA.
- Performed routine system maintenance, including OS updates, driver installations, and basic malware scans.
- Supported classroom and office IT equipment, including desktops, printers, projectors, and AV systems.

PROJECTS

Enterprise Security Monitoring & Active Directory Lab

- Designed and deployed a virtualized Active Directory environment simulating a corporate network (corp.local) using VirtualBox, Windows Server 2022, and Kali Linux.
- Configured a Splunk SIEM instance to ingest and index Windows Event Logs (Security, System) and Sysmon data for real-time visibility.
- Simulated adversary attacks, including RDP/SSH brute-force (using Hydra) and Kerberoasting to generate realistic threat telemetry.
- Developed custom Splunk dashboards and alerts (SPL) to detect unauthorized login attempts, successfully reducing "Mean Time to Detect" (MTTD) for simulated incidents.
- Hardened the domain environment by implementing Group Policy Objects (GPOs) to restrict administrative privileges and enforce password complexity.

Job Application Tracker - Java, JavaFX, MVC

- Built a desktop application with CSV-based persistent storage, implementing strong input validation and error handling to ensure data integrity.
- Developed administrative features for record management and filtering, simulating operational monitoring dashboards.

SKILLS

- **Technical:** Windows & macOS Administration, Networking Fundamentals (TCP/IP, DNS, DHCP), Basic Network Security & Firewall Configuration, Endpoint Troubleshooting, VPN, MFA, Microsoft 365
- **Tools & Platforms:** ServiceNow, Jira, Remote Support Tools (TeamViewer, AnyDesk)
- **Programming:** Java, Python, C, C++, SQL, JavaScript, HTML/CSS
- **Certification:** CompTIA Security+ (In Progress, Expected May 2026), CCNA (In Progress, Expected Dec 2026)
- **Languages:** English, Mandarin
